

Motorway tolls

We want to write a program to elaborate statistics on motorway tolls paid by motorists along the A4 Turin-Milan motorway. The file **toll.txt** lists each motorway section, one per line, with its toll, in the format:

```
tollBooth1;tollBooth2;toll
```

where *tollBooth1* and *tollBooth2* are two strings that indicate the beginning and end of the motorway section, uniquely identifying it. *Toll* is a real number that represents the cost of the toll for that route. The motorway sections are shown in consecutive order along the Turin-Milan direction. Note, however, that the motorway can be traveled in both directions (i.e. also from Milan to Turin).

A second file **car.txt** shows the list of cars (identified by the license plate number) that have passed along the A4 motorway, with the indication of the entrance toll booth, the exit toll booth and the day of travel:

```
licensePlate;tollBooth1;tollBooth2;day
```

The same license plate can appear several times in the file: it means that the car has entered the motorway several times (on different dates).

For each license plate, in the output, the program must display:

1. the total toll paid
2. the total number of motorway sections travelled
3. the number of distinct entrances.

The order in which the plates are listed is indifferent.

Finally, the program must display the car's license plate that paid the highest toll in output.

Example

Contents of the *toll.txt*

```
Turin;Settimo Torinese;1.30  
Settimo Torinese;Volpiano;1.00  
Volpiano;Rondissone;2.10  
Rondissone;Borgo d'Ale;2.10  
Borgo d'Ale;Santhia;1.30  
Santhia;Carisio;0.30  
Carisio;Balocco;0.70
```

Toy;Greggio;0.90
Greggio;Biandrate;1.00
Biandrate;Novara;1.00
Novara;Marcallo Mesero;3.20
Marcallo Mesero;Arluno;0.70
Arluno;Rho;0.90
Rho;Milan;2.90

Contents of the *car.txt*

FI245LE;Turin;Santhia;4/9/2024
BY010TE;Turin;Milan;7/9/2024
EX456OR;Carisio;Balocco;7/9/2024
EX456OR;Rho;Santhia;8/9/2024
BY010TE;Novara;Borgo d'Ale;9/11/2024
TR472UE;Biandrate;Greggio;12/9/2024
TR472UE;Milan;Turin;14/9/2024

Output example

FI245LE: 7.80 toll paid (5 routes covered in 1 entrance)
BY010TE: 24.60 toll paid (20 sections covered in 2 entrances)
EX456OR: 9.40 am toll paid (9 sections covered in 2 entrances)
TR472UE: 20.40 toll paid (15 routes covered in 2 entrances)
The car that paid the highest toll has a BY010TE license plate.
